## SKILLS SUMMARY

|                  |                                                                               |
|------------------|-------------------------------------------------------------------------------|
| Languages:       | C++, C, Python, Java, JavaScript, SQL                                         |
| Frontend:        | HTML, CSS, JavaScript(ES6), React.js, Bootstrap, API Integration              |
| Backend:         | REST APIs, HTTP/HTTPS, Database Integration, MySQL, MongoDB                   |
| Developer Tools: | Git, GitHub, Postman, Jira                                                    |
| Core Subjects:   | Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks |
| Soft Skills:     | Problem-Solving, Adaptability, Team Collaboration                             |

## INTERNSHIP

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Full Stack Intern — Vinayaka Services                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | July 2026 – Present |
| <ul style="list-style-type: none"><li>Developed and integrated responsive web application features using <b>HTML, CSS, JavaScript, React.js, and Node.js</b>, improving usability and delivering functional frontend and backend components.</li><li>Built and integrated <b>RESTful APIs</b> with backend services, implementing data handling and CRUD operations to support application functionality.</li><li>Collaborated on debugging, testing, and optimizing full-stack features, resolving technical issues and improving <b>application performance, responsiveness, and code quality</b>.</li></ul> |                     |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                       |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| Assignment Management System – AI-Powered Learning Platform   <a href="#">GitHub</a>   <a href="#">Live</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Mar 2026 – April 2026 |
| <ul style="list-style-type: none"><li>Designed a modular backend architecture using <b>Node.js, Express.js, Mongoose, and MongoDB</b>, developing <b>RESTful APIs</b> to efficiently manage users, courses, assignments, submissions, evaluations, and academic data across different application workflows</li><li>Implemented secure role-based access control, <b>JWT authentication, Bcrypt</b> password hashing to protect sensitive user information while providing dedicated workflows for students and tutors to manage assignments, submissions, feedback, and evaluations.</li><li>Integrated the <b>Groq API</b> into the assignment evaluation pipeline to enable <b>AI-assisted</b> grading and automated feedback, streamlining the assessment process and providing students with faster, actionable feedback on their submitted assignments.</li></ul> <p><i>Tech Stack: Node.js, Express.js, MongoDB, Mongoose, JavaScript, HTML5, CSS3, Groq API, JWT, Bcrypt</i></p> |                       |
| Duckshow – Full-Stack Streaming Platform   <a href="#">GitHub</a>   <a href="#">Live</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Feb 2026 – Mar 2026   |
| <ul style="list-style-type: none"><li>Engineered a full-stack streaming platform using <b>React.js, Vite, Node.js, Express.js, and MongoDB</b>, delivering a responsive web interface for content discovery, user account management, personalized lists, and seamless navigation across the application.</li><li>Integrated <b>JWT-based authentication, RESTful APIs, Mongoose data models, and automated email services</b> to handle account management, backend data communication, and core system processes while ensuring robust role-based access control.</li><li>Developed reusable <b>React components and responsive pages</b> for content browsing, user profiles, authentication, settings, notifications, and list management across different application workflows.</li></ul> <p><i>Tech Stack: React.js, Vite, Node.js, Express.js, MongoDB, Mongoose, JavaScript, HTML5, CSS3</i></p>                                                                                |                       |

## TRAINING

|                                                                                                                                                                                                                                                                                                               |                      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| Summer PEP Training   <a href="#">Certificate</a>                                                                                                                                                                                                                                                             | June 2026 – Aug 2026 |
| <ul style="list-style-type: none"><li>Strengthened programming fundamentals through structured training in <b>data structures, algorithms, and problem solving</b>.</li><li>Practiced algorithmic problem-solving techniques to improve <b>logical thinking and competitive programming skills</b>.</li></ul> |                      |

## CERTIFICATIONS

|                                                                                |           |
|--------------------------------------------------------------------------------|-----------|
| Udemy Generative AI for Beginners   <a href="#">Udemy</a>                      | Aug 2026  |
| Udemy Full stack generative and Agentic AI with python   <a href="#">Udemy</a> | July 2026 |
| Oracle Certified Foundations Associate   <a href="#">Oracle</a>                | May 2026  |

## ACHIEVEMENTS

|                                                                                                                                |          |
|--------------------------------------------------------------------------------------------------------------------------------|----------|
| Earned <b>LeetCode 100 Days Badge</b> with 103 active days and a 43-day maximum streak.   <a href="#">Codolio</a>              | Aug 2026 |
| <b>Secured 3rd position among 300+ teams</b> in <b>ALGO ARENA 2.0 Hackathon</b> , demonstrating strong problem-solving skills. | Mar 2026 |
| <b>Technical Specialist, Inferno.org, LPU</b> — Provided technical support and coordinated team activities.                    | Oct 2025 |
| <b>Secretary General, Dynamic Vertos LPU</b> — Led teams, coordinated events, and managed technical initiatives.               | Aug 2024 |

## EDUCATION

|                                                                         |                    |
|-------------------------------------------------------------------------|--------------------|
| Lovely Professional University                                          | Punjab, India      |
| Bachelor of Technology in Computer Science and Engineering; CGPA – 7.63 | Aug 2024 – Present |
| Kunwar Singh College                                                    | Bihar, India       |
| Intermediate – 71%                                                      | Mar 2021 – 2023    |
